

TERRAZZO

Advancing the terrazzo art

TERRAZZCO

IS A PRECAST TERRAZZO MANUFACTURING COMPANY DEDICATED TO BRINGING THE LATEST TECHNIQUES AND PRODUCT INNOVATIONS TO THE TIME-HONORED ART AND CRAFT OF TERRAZZO.

Beautiful and tough

Terrazzo's epoxy resin features a natural resilience, so there is less likelihood of cracking than with other, cement-based, terrazzo products. It is also highly resistant to chemicals, both acidic and alkaline. ■ We also incorporate mold and mildew resistance by adding a leading proprietary component into our precast product. ■ Another durability feature is the color stability. This makes matching color to fit the design much easier, and assures that not only will our terrazzo products stand up under tough, day-to-day usage conditions, they will also retain their original beauty for the long term.

We offer a wide variety of cement and epoxy based precast terrazzo products for virtually any application or design requirement.

■ Terrazzo's focus is on supplying a product which can stand up to the toughest requirements. Whether your project is commercial or residential—slabs, stairs, panels, tiles or base—Terrazzo has the product solutions for you.

Material and color options to fit any design

Terrazzo has been at the forefront of the industry in bringing the traditional beauty and durability of terrazzo into the twenty-first century.

■ The advanced epoxy resin products we offer can incorporate a wide variety of both conventional and innovative aggregate materials. Combining this with virtually unlimited color choices—from subdued, natural tones to vivid hues—gives designers and architects a range of aesthetic options not available with any other terrazzo products.

OUR NORTH CAROLINA MANUFACTURING PLANT UTILIZES THE HIGHEST QUALITY SPECIALIZED MACHINERY AVAILABLE IN THE INDUSTRY.

Works where you want it to work

The advanced epoxy resins used in our process yield a strong but light-weight precast terrazzo material ideally suited for a variety of applications such as stairs, countertops and wall cladding. Its lightness at 3/8" thickness delivers a significant advantage in renovations without adding excessive weight to existing floors. ■ Terrazzco's precast epoxy resin terrazzo is supplied in a variety of sizes to fit virtually any project specification.

RESILIENCE, COLOR STABILITY AND WIDE CHOICE OF INNOVATIVE AGGREGATE MATERIALS ARE AMONG THE REASONS THAT LEADING ARCHITECTS AND BUILDERS CHOOSE TERRAZZCO.

THE BENEFITS OF TERRAZZCO'S PRODUCT SOLUTIONS INCLUDE:

- Unlimited design and color options
- Low cost over long lifecycle
- Ease of maintenance
- High durability
- Resistance to color fading
- Lighter weight options
- Built in mold and mildew resistance
- Chemical resistance
- Class A and B flammability rating

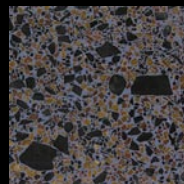

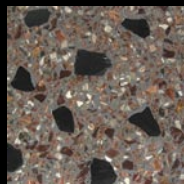

A unique selection of styles and colors

Here is a limited sampling of the many styles and colors we offer. Visit our website at www.terrazzco.com to see more options, or contact us for samples.

CLASSIC

The Classic line contains aggregate of smaller natural stones such as marble, granite and pebble.

- Classic White*
